

A person is seen from behind, operating a pallet stretch film wrapper. The person is wearing a dark t-shirt with a logo and text on the back. The background shows the industrial machinery of the wrapper in a warehouse environment. The image is overlaid with a semi-transparent dark grey layer, and a horizontal green line is visible across the middle.

# GUIDE TO BUYING

*A Pallet Stretch Film Wrapper*

**sal-tech.com**  
EASY PACKAGING

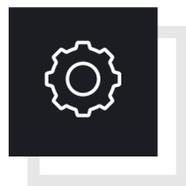

# SIMPLE BUT EFFECTIVE DESIGN

*Semi Automatic Pallet Wrapper*

# E3 WRAP 2100 SERIES

## **E**ECONOMIC

With a low entry price compared to similar products on the market anyone can take their hand packaging of pallets to a semi-automated solution.

## **E**RGONOMIC

With no ramp & lightweight rolls of stretch film anyone can use the E3 without damaging their back. No risk of pallet rolling away or tip over. Just place the pallet on the floor and start wrapping!

## **E**COFRIENDLY

All the machines in the E3 series are made in highly recyclable materials with easy disassembly & with low power consumption throughout its lifecycle.

/ E3 Product Series

US pallet: 1000 x 1200 mm

Industrial: 1350 x 950 mm

# SAFETY FIRST!

All of our machines in the series have a built in safety system stopping the rotating arm if an obstacle would appear when in use.

Having a solution that DOES NOT require a ramp means no heavy pushing or dragging of pallets up onto a rotation plate where the pallet could roll off and cause personal injury or damaged products.

# OUR CLIENTS

*Our vision is to provide creative solutions & problem solving to our clients world wide*

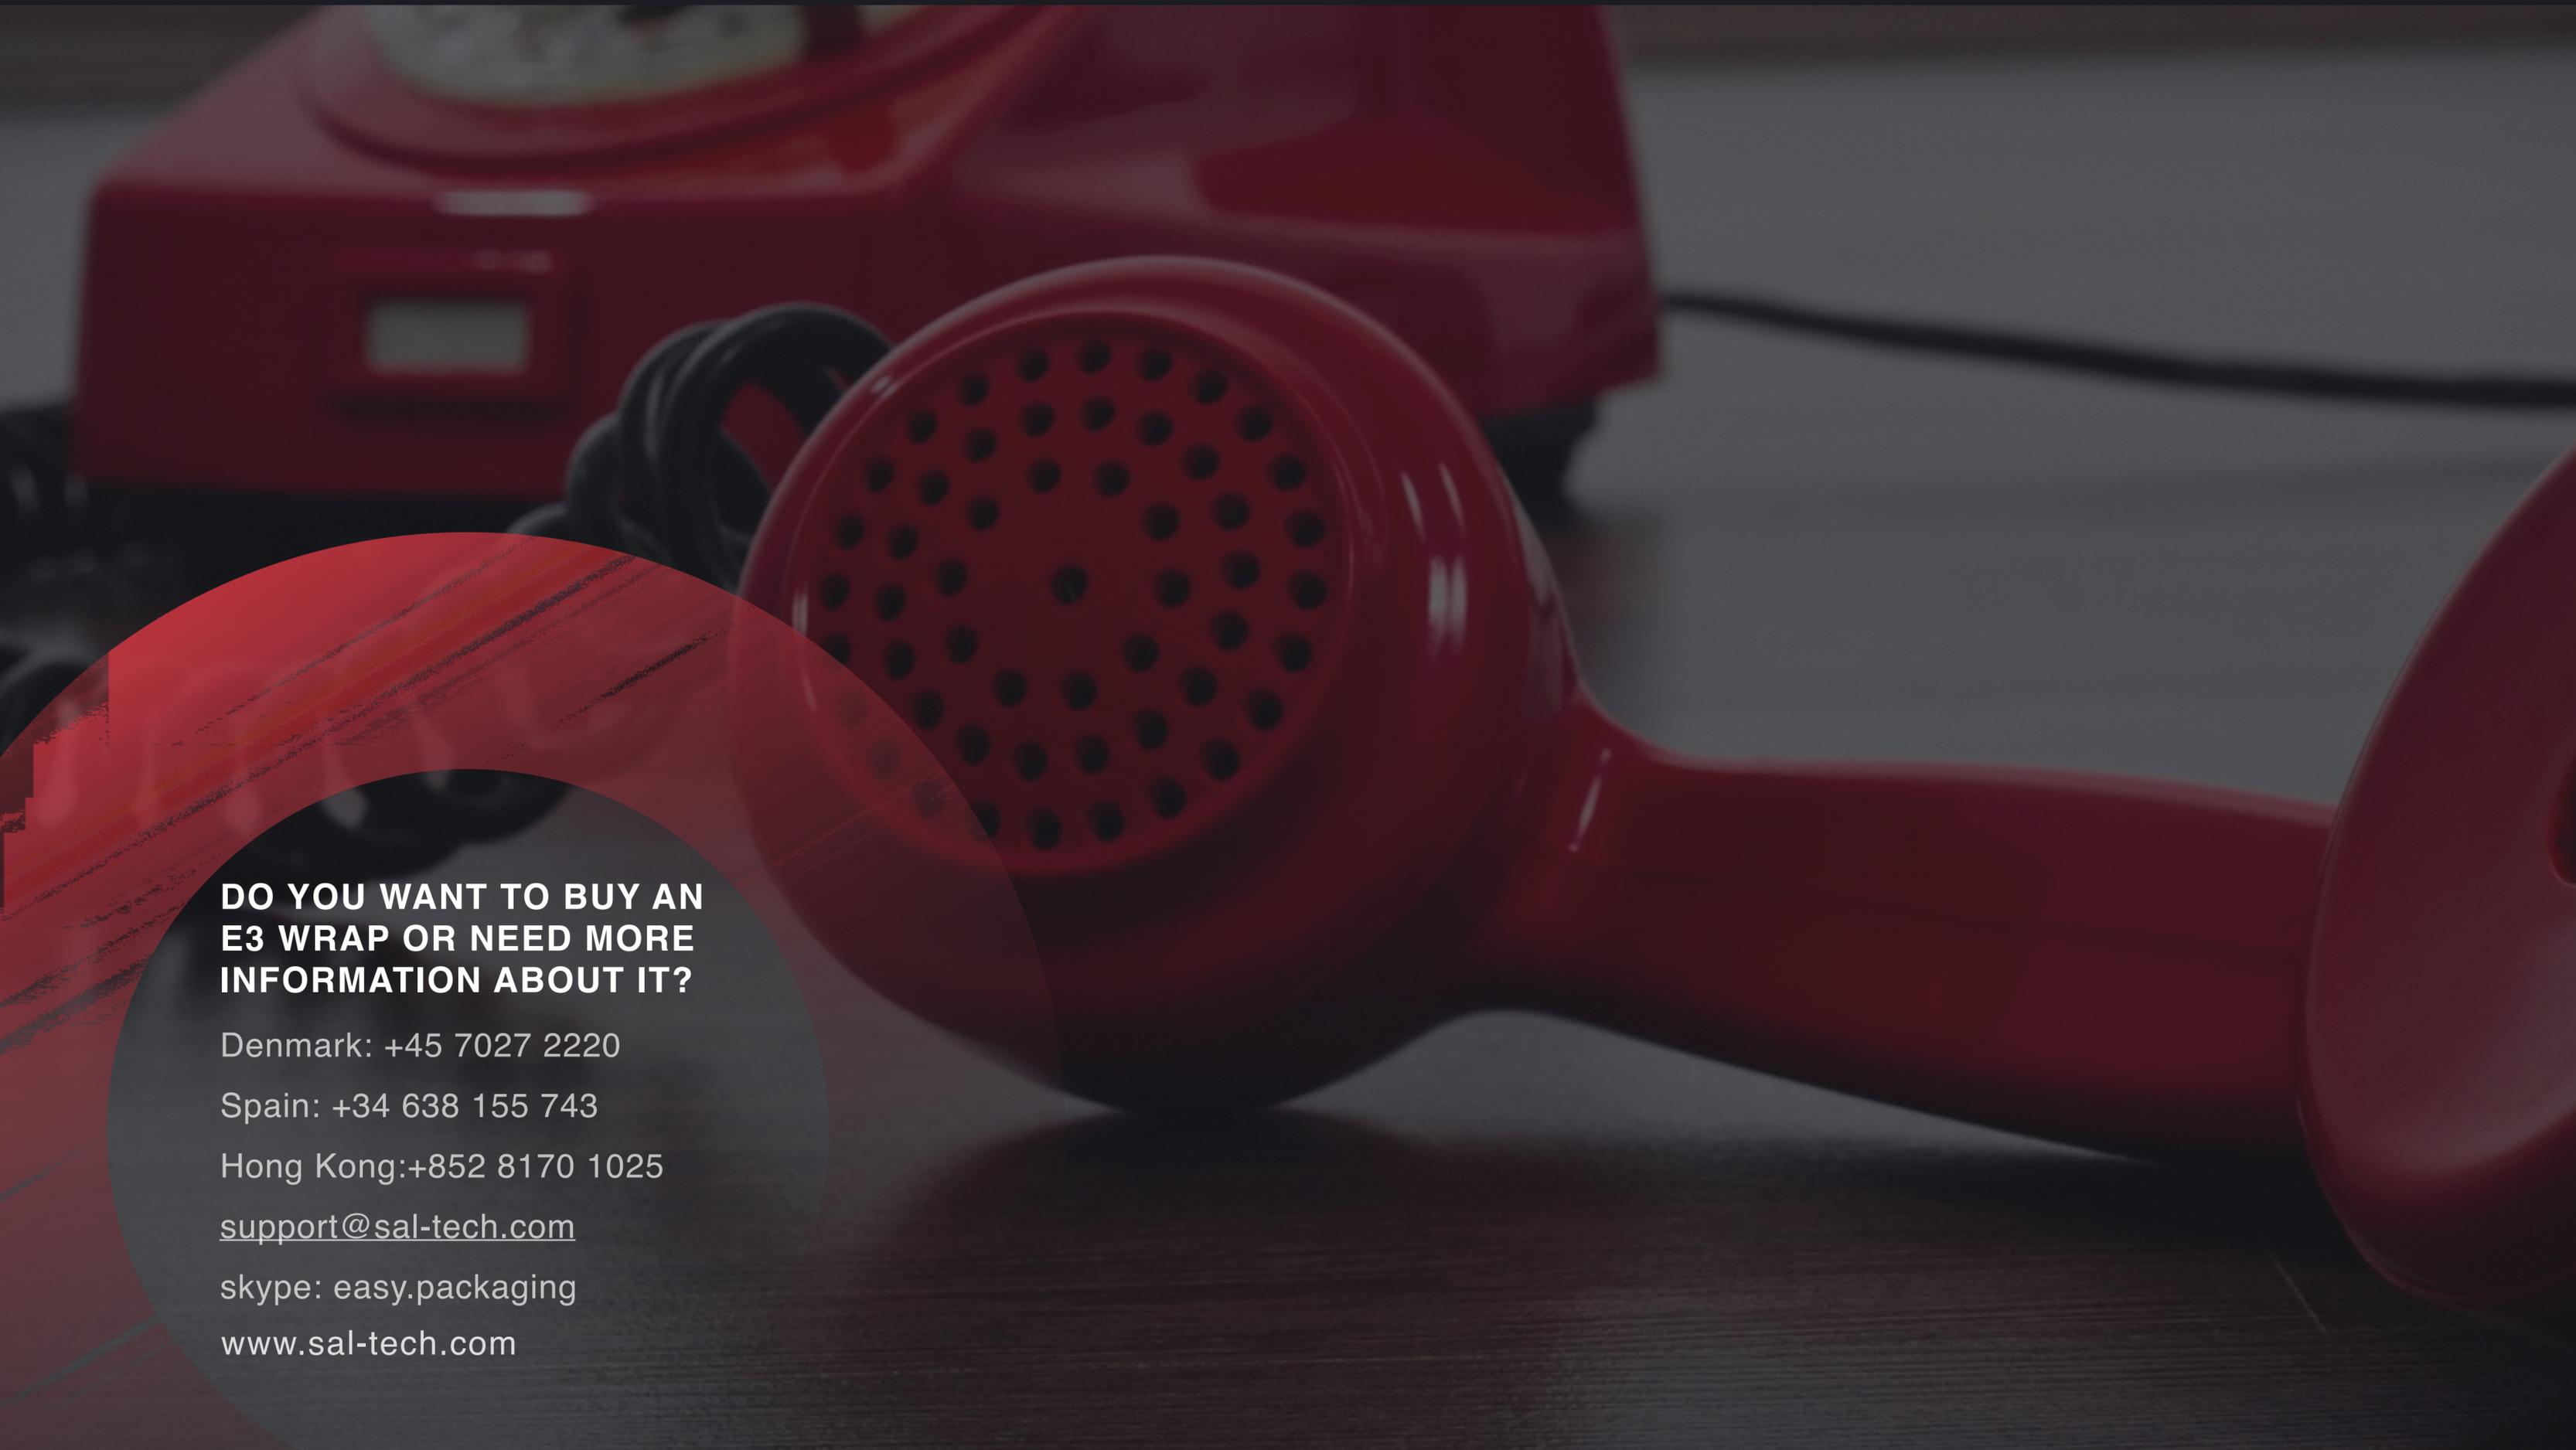

A hand is shown pressing a button on a white electronic device. The device has a prominent red circular dial at the top with two white curved arrows indicating rotation. The background is a blurred workspace with a keyboard, a piece of paper with handwritten text, and several metal nuts scattered on the surface. The entire image has a semi-transparent blue overlay.
