

STEP 900ECA Hand operated Automatic Sealer with cutter

STEP 900ECA Hand operated Automatic Sealer with Cutter is intended for the sealing of polyethylene and polypropylene film bags.

Electronically controlled impulse sealing. Impulse sealing requires congealing time.

PE, PP, OPP, PVC, POF... are ideal materials for single sealing.

Application:

1. When you press the Handle, the upper bar will be sucked by the electromagnet.
2. Time is up after sealing and congealing.
3. Cut the bag edge or tube film using the knife.
4. To lift the sealing bar, press the release button.

| Specification | |
|------------------|--|
| Model | STEP 900ECA Hand-operated Automatic Sealer with Cutter |
| Voltage | 220V |
| Power (Watt.) | 1400W |
| Amps. | 15 A |
| Max. sealing | 900 *2.7mm/5mm |
| Heating Time | 0-1.5 sec. |
| Max. Temperature | 250 °C |
| Dimension | 976*270.6*217cm |
| Weight | 32.1 KG |
| Item No. | 49910900 |
