# Unique solution for eliminating pallets

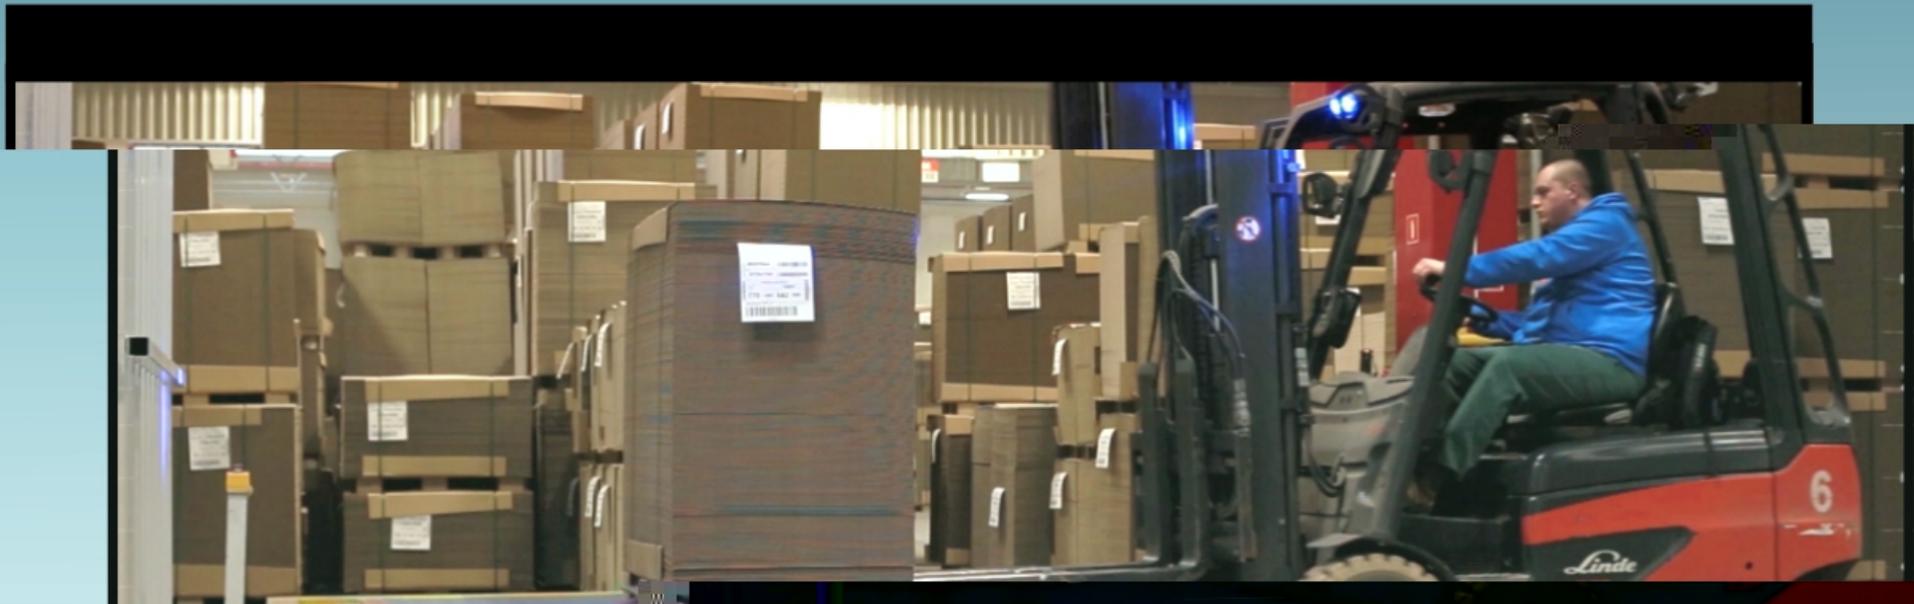

## How it works?

The device selects adequate layout and number of paper core feet to be stuck, taking into account the dimensions of the load

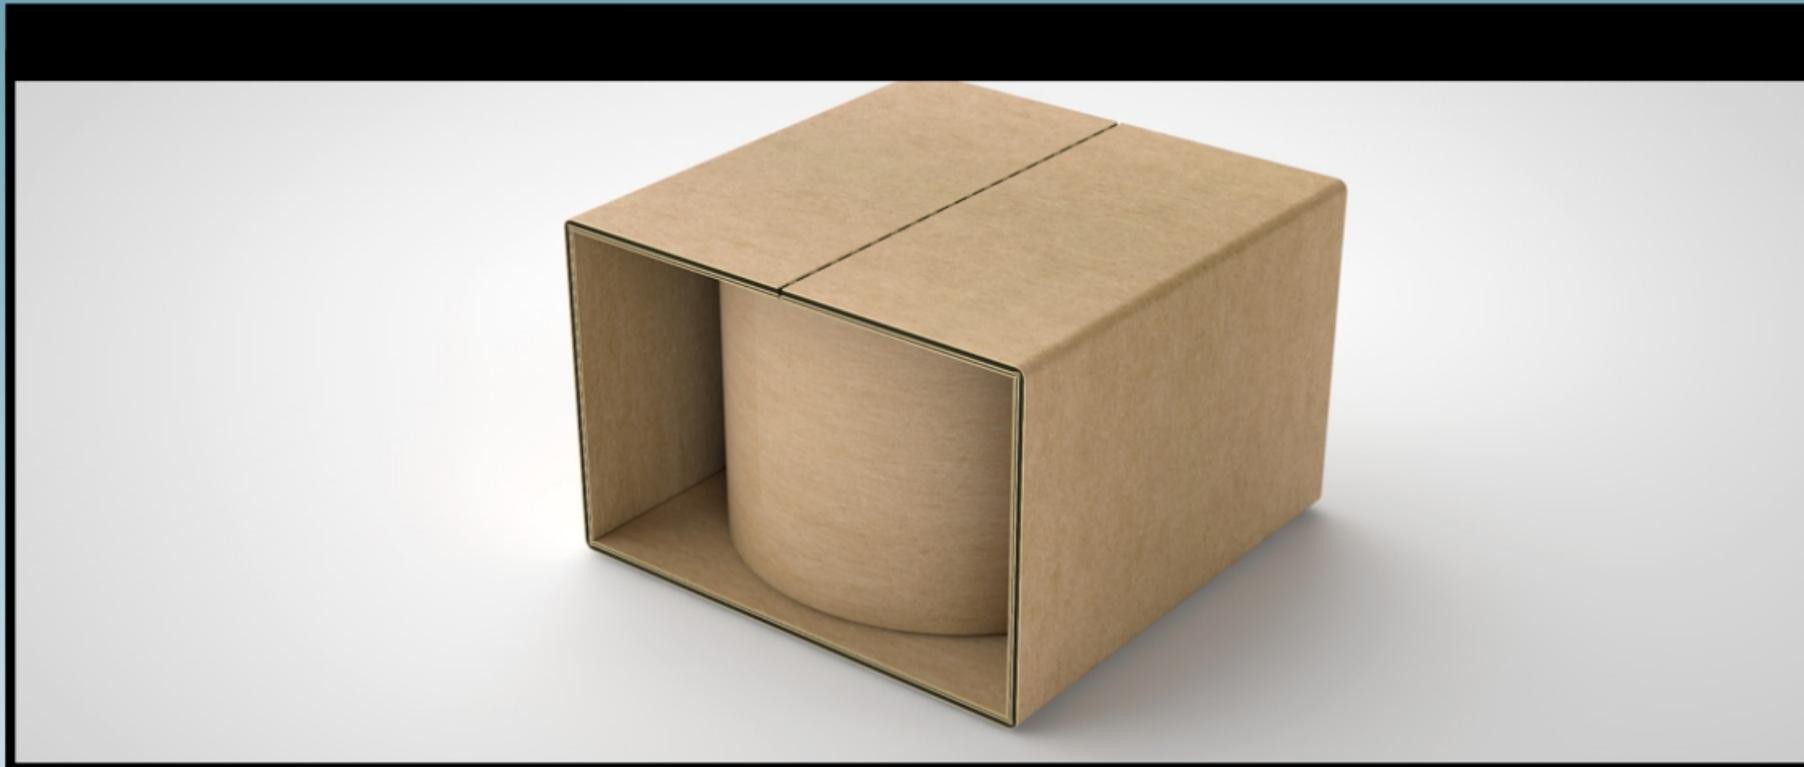

## Is it easy to transport?

The layout of the paper feet stuck to the packaging allows to transport the load with the use of hand pallet trucks and forklift trucks

## Paper core foot

Our paper core foot is patented and has been designed by our engineers. It is built durable, paper core wrapped with cardboard jacket.

**Paper core foot is produced in a machine of our construction.**

The paper core is dipped in H.B Fuller Swift® tak 5949 water glue, based on EVA (copolymer of ethylene and vinyl acetate), a liquid glue, with a characteristic fragrance. It contains no dangerous ingredients, and is non-flammable.

# The palletless uses H.B. Fuller CLEANMELT PHC 7688 glue.

- Hotmelt glue based on hydrocarbons and EVA, in the form of granulate
- It has a characteristic fragrance,
- It contains no dangerous ingredients, is not irritant and in regular temperatures non-flammable

# Paper Core Foot system Benefits:

1. Savings of at least EUR 1.00 per each produced pallet
2. Optimum filling of transport space of a truck
3. No storage space for pallets needed
4. Made of 100% recycled papers
5. Return on investment just after producing 120,000 pallets

# Paper Core Foot system

## It's all about the benefits

Ready-made solutions

Innovative product

Maximum weight of the goods: up to 1,5 t

Ecological solutions

Recyclable product

Endless possibilities

Easy to use

Reduction of costs

Perfect for air transport
