

STEP I-50 Random Top & Bottom, Side Belt Drive Tape carton Sealer

STEP I-50 Automatic Flaps Folding Carton Sealer an automated machine that folds the top flaps, then seals top and bottom by adhesive tape. The sensor installed on top of the machine identifies an incoming carton, and an adjustable air pressure gives force on folding the top flaps. A very easy to operate and maintain provided by the electronic box control system.

Features:

- Automatically adjusts the height and width based on carton sizes;
- Advanced pneumatic control system compared with the complicated electrical control system;
- Fold the top covers automatically, side belts driven top and bottom sealing;
- Safety cutter system to prevent hands on touching the cutter
- Sensor detecting the incoming carton
- Air pressure can be adjusted
- Electronic box control system

SPECIFICATIONS:	
Dimension (LWH)	L170xW880xH1450mm
Weight	280KG
Model	STEP I-50
Conveyor Speed	20m/min
Packing Size Maximum (LWH)	L200-500xW150-500xH115
Power Supply	230V 50/60Hz
