

## STEP K-40 Automatic Carton Erector and Bottom Sealing

**Machine** is a carton erector added with a bottom sealing function. This machine is suitable for forming, folding, and sealing of boxes, eliminating downtime with its easy carton infeed feature. Engineered to simultaneously prepare boxes for other purposes, this equipment is also enhanced to keep employees or operators safe from cutter injuries. Improving a safe and fast forming to sealing process. An adhesive tape width of 48mm, 60mm, or 75mm is compatible with the machine, certainly pushing productivity at the top.

### Features:

- High Standard Materials: Electrical and pneumatic parts are imported and of high standard quality
- Easy Feeding of Cartons: Cartons may be added without stopping machine operation, eliminating downtime
- Forming and Sealing: Applicable for forming and sealing cartons of same sizes
- Adjustable Carton Size: Manual modification to change carton size, finishing in 2 to 3 minutes
- Photoelectricity Induction Control System
- Safety System: Cutter is safe for use, and injuries from stabs are prevented
- Durable and Compact Built: Reduces waste of time as machine forms, folds, and seals simultaneously
- Vertical Storage
- Lightweight
- Speed
- Quality Performance

SPECIFICATIONS:	
Dimension (LWH)	2000mm x 1900mm x 1450mm
Weight	450kg
Model	STEP K-40
Speed	12 cartons per minute
Carton Size Capacity (LWH)	250mm-450mm x 150mm-400mm x 100mm-400mm
Power Supply	230V, 50Hz, 200W with Siemens Plug or Request for Other Voltage Version
Air Compression	6kg/cm <sup>3</sup>
Air Consumption	450NL/minute
Adhesive Tape Width	48-50mm/60mm/75mm
STEP Item No.	42121010
