

STEP ZD-08 Table Type Mini Automatic Strapping Machine

Description:

The STEP ZD-08 is a super compact, economical strapping machine designed for small spaces like stores and offices. With its double motor system, it offers powerful strapping force and reliable performance, making it ideal for efficiently securing small packages. This machine is versatile, offering semi-automatic, automatic, and adjustable options to meet different packaging needs.

Features:

- **Dual-Motor Design:** Provides strong strapping force and durability, ensuring long-lasting service.
- **Multiple Operation Modes:** Offers manual switch, touch switch, and foot switch options for flexibility.
- **Efficient Cooling System:** Equipped with a high-power turbo cooling fan for 24-hour continuous operation.
- **Easy Installation:** External belt reel and adaptive reel core prevent tape scattering and simplify installation.
- **Adjustable Strapping Tension:** Tension can be set from 30N to 70N, allowing customization based on packaging requirements.

Product Benefits:

- **Space-Efficient Design:** Ideal for stores and offices with limited space, providing a compact and effective strapping solution.
- **Reliable and Durable:** Dual motors and efficient cooling allow for continuous operation, ideal for small-scale industrial settings.
- **Flexible Strapping Options:** Adjustable tension and multiple operation modes make it adaptable to different package types.

Applications:

Perfect for use in stores, offices, and small-scale packaging environments, the STEP ZD-08 provides an efficient, compact solution for strapping small packages securely and economically.

Specifications	
Power Supply	110V/220V 50Hz/60Hz
Machine Size (LWH)	765 x 325 x 406 mm
Strap Width	8 mm
Strapping Force	1 to 20 kg (maximum)
Cycle Time	3 seconds per cycle
Packing Weight	5 kg (maximum)
Item number	41081010
